

About Falconwood, Inc:

Falconwood, Inc. is a small, woman/veteran-owned business providing executive level consultants and programmatic support to Department of Defense Information Technology (IT) initiatives and programs.

We provide expert consultation on a diverse range of IT subjects focusing on acquisition strategy, implementation activities and Information Assurance policy and engineering.

We support the total lifecycle of Information Technology systems and applications.

We have an immediate opening for a **System Engineer** who knows their way around the IT Operations environment. If you want to be part of a dynamic team and want to provide yourself with a daily challenge, this job is for you.

Again, if you are currently in the market for an exciting challenge, review the below position description to see how this immediate opportunity can be a great fit for your career path.

Job Description

The system engineer will support a major Department of the Navy enterprise network; ensuring that life cycle projects to support the functions of the enterprise are delivered on time. The system engineer will primarily interact with government customer, as well as contracted service provider.

Duties and Responsibilities

- Ensure client deadlines are met; ensure success to accomplish project objectives on time, within budget and to client expectations.
- Support product evaluations and provide solution consulting; be able to support technical direction and oversight relative to specific projects/solutions, and identify solution alternatives.
- Support solution costing initiatives; be able to document cost elements including price quotes, and capture cost information using design proposal overviews.
- Document testing specifications to support validation efforts at time of solution installation.
- Develop estimates for future phases or spirals.
- Prepare for gate reviews.
- Oversee the delivery and development of all elements of projects.
- Identify process improvement opportunities.

Skill and Specifications

- Able to work with other people.
- Able to work independently and without supervision.
- Be of high aptitude and keen on detail.
- Must have a strong understanding of the DoN Acquisition process.

Education and Qualifications

- Have a strong grasp of Computer Science/Information Systems.
- Familiar with systems of operation such as Unix, Windows as well as Microsoft Office environment (use of tools, and their integration as a business tool).
- Must have an Active Secret security clearance.

The following bachelor's/Master's degrees are acceptable.

- A Bachelor's or Graduate's degree in Computer Science.
- A Bachelor's or Graduate's degree in Systems Science.
- A Bachelor's or Graduate's degree in Engineering.
